## SUMMARY

---

I'm a motivated, quick learning, and resourceful full-stack web developer with real-world experience working effectively in teams and engaging with clients. Discovering the potential of coding to do good, I plunged head first into a bootcamp to learn the fundamentals of modern technologies to build something I can share with the world. I'm excited to pursue a position as a junior software engineer or web developer and contribute technical and collaborative value to a mission-focused company.

## SKILLS

---

JavaScript, Ruby on Rails, Ember.js, HTML5, CSS3/Sass, jQuery, Bootstrap, Ruby, AJAX, Git/GitHub, Mongoose.js, Express.js, Node.js, MongoDB, PostgreSQL, Handlebars, Heroku, RESTful API

## WEB DEVELOPMENT PROJECTS

---

### Beaux-Ties

Utilizing the front-end framework Ember.js and building the API with Ruby on Rails, Beaux-Ties is an e-commerce site selling bow-ties. Users can view, add to a wishlist, and add to/remove from a shopping cart.

### Bucket List

In this group project, a user can create and track their life goals in an easy-to-use way. New technologies used include Express, Node.js, Mongoose, and MongoDB for building the API. I gained experience pair programming and working with international team members.

### Here & There! A Travel Journal

A digital travel journal where users can CRUD journal entries about their travels across the USA. The API was built with Ruby on Rails. On the front-end, Handlebars.js and Bootstrap were used to clearly display journal entries.

## EMPLOYMENT

---

### Web Developer in Training, *General Assembly*, Boston, MA

Jan 2018 - Apr 2018

- Successfully completed about 600 hours of in-class learning and self-study in a 12-week full-stack web development immersive program
- Growth-mindset instilled in order to quickly learn, understand, and implement new tools and concepts
- Created three individual and one group projects from ideation (wireframes, ERDs, user stories) to execution (deployed SPAs); each was finished in one-week sprints
- Introduced to and gained some experience with Agile/Scrum development

### Director, *STRIDE, Inc.*, Cambridge, MA

Aug 2012 - Current

- Collaborate with various stakeholders in organizing and implementing diverse weekly, monthly, and annual programs to support college students' spiritual, social, emotional, and physical well-being
- Manage organizational needs, like completing a two year process to gain 501(c)(3) non-profit status, applying for project funding (\$15,000+ over two years), and organizing fundraising campaigns (\$25,000+ in match campaigns over three years)
- Experience with public speaking and providing leadership training to students, churches, and national organizations
- Design and manage strideboston.org (using Squarespace), company Facebook page, and MailChimp newsletter

### Customer Support Agent, *INSTANT-2290.com*, Cambridge, MA

Apr 2016 - Jan 2018

- Assisted customers over the phone and/or via email to successfully electronically file the IRS Form 2290 in a timely fashion
- Drafted and finalized over two dozen FAQ and procedural articles for use by all CSAs - a first for the company
- Effectively communicated customer pain points to supervisors and helped brainstorm solutions

## EDUCATION

---

### Bentley University

Masters Taxation 2009

Bachelors Accountancy 2008

### Grenoble Graduate School of Business

Certificate Entrepreneurship Thinking 2009

Graduate Study Abroad Course in Grenoble, France
